Most flat screen televisions and monitors have a VESA hole pattern on the back of the screen. VESA (Video Electronic Standard Association) is the worldwide standard that all manufacturers of flatscreens use. On VESA compliant screens you will find 4 screw holes in a square or rectangle on the backside of the screen. NewStar's mounting solutions are all designed to fit the various VESA standards. NewStar also has solutions for flat screens that are not VESA compliant. Please use the Screenfitter on our homepage to check the compatibility. In case you have any questions about the compatibility of NewStar mounts for your flat screen, please feel free to contact our sales department.

FLAT SCREEN CEILING MOUNTS

The image shows a woman with long brown hair and a man in a grey suit looking at two large flat-screen monitors mounted on a ceiling in an airport. The left monitor displays a flight information board with columns for Flight, Gate, Status, Time, Destination, Flight Number, and Status. The right monitor displays directional signs with icons and text for Check-in, Departures, South Terminal, Restaurants, and Hotels. Below the monitors, a yellow sign reads 'Departu' and a green sign reads 'Restau'.
